

So far we could guess that a typical user would mostly likely not be interacting with your site while they are 'on the go' - they would probably be in an office and might have already made a decision to seek you out (not on a whim per say)?

- Correct

What problems do you personally see with your site? What are some areas you would like to see improved?

- I would like to make it clear who we are and what we do
- Also, I would like the contact info updated and in a more logical place
- I would also like to show-off our past projects in a better way. I am proud of our past work and would like to reflect that.
- Going off that, the About Us section is pretty sparse

Is there anything other personal goals you have for the site? By that I mean is there anything intangible that you envision for the site?

- We have always thought that the look of the website is very bland and amateur, it would be nice to have a more professional look.
